

*Single point circulation system for connection for two or three station rail.*

**NPS-200 SERIES**

**Dual Manifold System**

#### NRS Benefits

- Fully passivated manifold assembly
- Quick installation
- Eliminates over 50% of paint station drop lines.
- Saves in cost of installation per automation zone.

*The cavity-free, stepless manifold design enhances color load times and color changes while preventing the formation of "dirt in paint."*

*Tapped plug for mounting or tag mounting.*

*Preinstalled HyLok 316 Stainless Steel modified with the Neptech fully encapsulated ball valve.*

*Full-flow passageways reduce shear and pressure loss, helping to maintain color brilliance and the integrity of the chemistry.*

*Minimizing pressure loss enables the paint circulation system to operate at lower pumping pressures, extending the life of system components and reducing maintenance needs.*

#### Two Outlet Manifold System "NRS-200 Series"

NRS-200	1/2" bulkhead compression inlet x (2) 3/8" NPS(M) outlet ball valves (stepped at 1" & 2" for hose connection access in drop box)
NRS-200L	Same as HRS200 except stepped at 3" & 4"
NRS-201	1/2" Compression inlet x (2) 3/8" NPS (M) reverse bulkhead outlet ball valves

# Neptech Inc.

Manufacturer of **FLEXOTHERM** products

## NEPTECH MANIFOLD RAIL SYSTEM

### PAINT 3 STATION BALL VALVE ASSEMBLY

*Single point circulation system for connection for two or three station rail.*

**NPS-300 SERIES**

**Triple Manifold System**

#### NRS Benefits

- Fully passivated manifold assembly
- Quick installation
- Eliminates over 50% of paint station drop lines.
- Saves in cost of installation per automation zone.

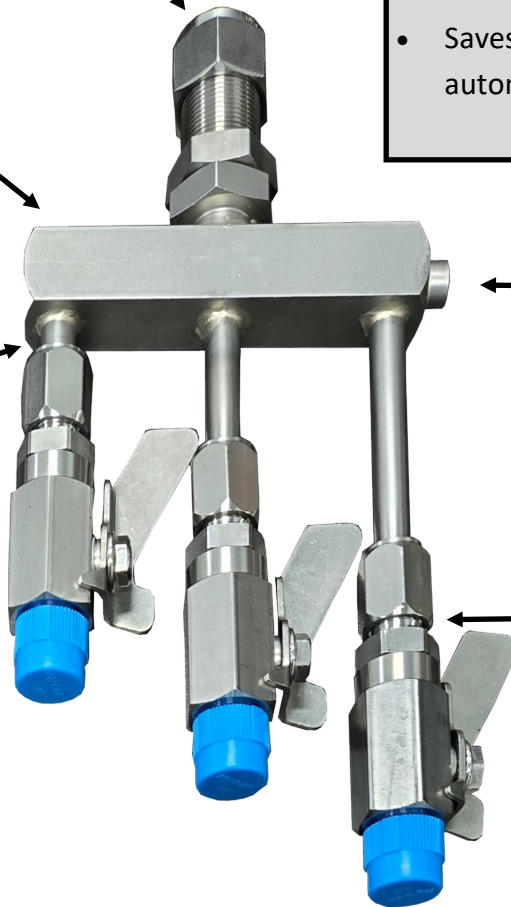

*The cavity-free, stepless manifold design enhances color load times and color changes while preventing the formation of "dirt in paint."*

*Tapped plug for mounting or tag mounting.*

*Preinstalled HyLok 316 Stainless Steel modified with the Neptech fully encapsulated ball valve.*

*Full-flow passageways reduce shear and pressure loss, helping to maintain color brilliance and the integrity of the chemistry.*

*Minimizing pressure loss enables the paint circulation system to operate at lower pumping pressures, extending the life of system components and reducing maintenance needs.*

### Three Outlet Manifold System "NRS-300 Series"

NRS-300	5/8" bulkhead compression inlet x (3) 3/8" NPS(M) outlet ball valves (stepped at 1", 2" & 3" for hose connection access in drop box)
NRS-300L	Same as HRS300 except stepped at 4," 5" & 6"
NRS-301	5/8" Compression inlet x (3) 3/8" NPS (M) reverse bulkhead outlet ball valves
