

Neptech Inc.

Manufacturer of **FLEXOTHERM** products

Chemical Vapor Sample Line

DUNS: 780473059

CAGE CODE: 4PKA3

Neptech Inc is the manufacturer of *Flexotherm*™ Chemical Vapor Heated Sample Lines expressly for use in the chemical analysis environment. These hoses are designed for collection, transporting and conditioning minute vapor sample concentrations to a remote monitoring system or analyzer.

Our Chemical Vapor Lines are designed to be tough enough to endure remote applications as well as precise laboratory use due to the engineered low profile design. Our proprietary construction ensures a constant heat profile that is paramount to provide accurate transport of sampling, to provide high quality analysis.

Key Features:

- High performance insulation and all weather construction
- Lightweight construction (less than 0.35lbs per foot)
- High recovery percentage rates
- Heating elements are made of high grade heat conducting alloys
- Extreme flexibility in any temperature condition
- Sample cores can be customized for your specific application with PFA, PTFE, FEP, or specified
- Rapid access to electrical terminals and tube junctions
- "Cold-Spot" elimination and low-noise construction
- Customer specified temperature sensors and temperature range control. Also available in self-regulating options
- Variety of operational voltages and lengths
- Multiple sample tube diameters
- Temperature data profiling available (optional)
- Tested and approved by independent labs including SWRI

Flexotherm™ is a division of Neptech, Inc. located in Highland, Michigan. For nearly 20 years **Flexotherm**™ has established a reputation as a manufacturer of reliable and cost-effective heated products. **Flexotherm**™ is a key supplier of systems and components for industrial research, development, and facility processes around the globe.

We are proud to be a service-disabled veteran owned company contributing to the renaissance of American manufacturing through the production and distribution of innovative, environmentally conscious components and related services.

Flexotherm™ services many domestic and international companies, harnessing new technologies that reduce emissions.

Flexotherm™ fully supports our national effort to promote environmentally friendly industrial operations through the implementation of clean and efficient processes, systems, and analysis.
